

Armed Intruder and Active Shooter in the Healthcare Facility

It can..AND HAS...happened. An armed intruder finds his way into the hospital. Now what? This exciting new program from Sorensen, Wilder & Associates allows your facility to:

- **Understand a State of Preparedness—Is your facility ready for the unforeseen emergency: environmental, accidental or hostile. Does your Emergency Operations Plan cover all it needs to cover?**
- **Define terminology and concepts specific to a hostile act within your facility; specifically, a focused and limited hostile event or a broad, facility-wide hostile event...understand how one type of incident can morph into another.**
- **Review a healthcare case study and discuss the unforeseen challenges that the event can generate adversely affecting the care and health of patients, performance of staff and operational state of the facility**
- **Learn how your staff can protect themselves during the commission of a hostile active event within the facility by utilizing ‘The 4 Outs’ of the *Active Shooter Safety Action Plan***
- **Understand the increased stress and anxieties that come hand-in-hand with an active hostile event and how to control those anxieties and stress thorough preparation and training**
- **Understand the critical decision making process and psychology behind it. Refine decision making skills in order to increase the likelihood of survival of staff and patients during an active hostile event**
- **Learn the S.T.A.F. Protocol....balancing the safety of staff , patients and visitors during an active shooter event within your facility**
- **Remain safe and alive during an active hostile event!**
